Work Experience and Projects Employed at Arista Networks since April 2018

Arista CloudVision Portal *2018 - Present*

Roles and Responsibilities

- Design, implement, support and lead new feature development for Nutanix Xtract
- Write automated tests
- Support customers during on-call rotation

Accomplishments

- Setup a Kubernetes based container farm for devices for testing scale
- Improving on boarding flow for newcomers with a Sphinx based course
- Writing scale tests with reporting using InfluxDB

Nutanix Xtract *2016 - 2018*

Roles and Responsibilities

- Design, implement, support and lead new feature development for Nutanix Xtract
- Enable QA engineers, documentation team and front end developers
- Support customers through on-call support

Accomplishments

- Lead the AHV hypervisor support feature in Nutanix Xtract for DBs
- Implemented error handling and remediation of Nutanix Xplorer
- Lead the release of AMF Xplorer 1.0

HPE Hyperconverged cloud

2016 - 2016

Front end developer at HPE Hyper converged cloud team

Roles and Responsibilities

- Implement the User Experience designed by designers for HPE HCI
- Iterate on designs and provide critical design feedback for designers
- Deliver a usable and useful hyper converged product on time

Accomplishments

Implemented Image Management

Technologies

ReactJS, Webpack, Gulp, SASS

HP Network Management Center

2013 - 2016

Worked as a core developer and security engineer for HP's Network Management Software called Network Node Manager i

Also worked as lead developer and lab support engineer for NNMi Network Engineer's Toolset

Roles and Responsibilities

- Design and implement new features end to end from front end to back end
- Enable other team members like QA, test automation, documentation members
- Mentor new team members
- Take lead and innovate to improve process and communicate the value delivered

Accomplishments

- Improving SNMP v3 USM specification compliance in the SNMP stack
- Enabling Network Function Virtualization support
- Port the Network Engineer's Tool set to Linux
- Add support for Safari on Mac
- Adding CSRF protection to the NNMi
- Released NNMi SPI NET 10.0, 10.10, 10.20, NNMi 10.10 and NNMi 10.20

Technologies

Java EE, JavaScript Dojo framework, Java Swing, etc

HP Network Node Manager 7.x lab support

2011 - 2013

Lab support engineer for Hewlett-Packard's premier Network Management Solution called NNM

Roles and Responsibilities

- Triage and solve customer reported issues through analyzing core dumps and logs
- Deliver timely hot fixes and release patches

Accomplishments

- Solved many multi-threading issues (ACE framework)
- Solved many cache coherence issues
- Released NNM 7.53 Intermediate Patches 31 and 32

Technologies

C, C++, Perl, SQL, Java

Side projects

Plivo Call Center

2015-Present

Functional call center application using Plivo API running on the Heroku Platform
<https://github.com/simula67/plivo-callcenter>

Open source

Perl 6 LWP

Merged a patch to Perl 6 LWP to match output of Perl 5 LWP
<https://github.com/simula67/perl6-lwp-simple>

Perl 6 Test Suite

Merged a patch to re factor some of Perl 6 official test suite
<https://github.com/simula67/roast>
